Hey y'all! My name is Bill W., but I used to go by the handle **BASICwebmaster**. I'm the Project Manager for Liberty Office, which is an attempt to write an open-source, light-weight office suite in Liberty BASIC. We haven't had much success with that so far, but perhaps someday it'll get off the ground.

Stuff

- [HQ9++ Interpreter](#) - fully standards-compliant!

Links

- [JustLiberty](#) - the unofficial successor to the defunct OSLB Youth Forum. Home of Liberty Office!
