Please visit the LB page and JB pages of my site below. You are always welcome to use my code as a basis for your programs. If you also look at the Free Programs page of my site, your will see I have been lucky to be able to persuade a number to distributors to host my efforts and publicise LB. So why do not you try likewise. Though I allow my work to be downloaded as Freeware, (which is perhaps why some distributors host it without asking me) you may be able to sell yours as Shareware etc.

See my notes in tips how I persuade distributors to host my work.
