

Here is a link to a KML file to play a flyover of all the stadiums in the Rugby World Cup in NZ.

Just click on Play in the right hand column to start the animation. The play / pause bar is bottom left. The animation stops at each stadium so you can admire the view. Use the play bar (bottom left) to move forward to the next one.

Individual stadiums can be seen from the left hand "Points and Properties" expansion.

Enjoy :
