

Welcome to the ShareFest 2008 wikipage.

Forum announcement:

<http://libertybasic.conforums.com/index.cgi?board=contests&action=display&num=1201515700>

If you have a program or article for the Fest, upload it to the Wiki and add a link to this page. [List entries below.](#)

We request you keep images file to a minimum and try to keep the file size small too.

And as always, Thanks for sharing your knowledge. :-)

Valentine's Day 2008 - ShareFest

Valentine's day is less than three weeks away and it seems as good a time as any to share a bit of our experience with one another. With that in mind, we've come up with the idea of a ShareFest.

The genesis for this idea is from my own Liberty BASIC programming experience. When writing an LB program my setup is --I'm sorry to admit-- rather primitive. And I'm betting there are much better ways to create a program than what I'm doing. Then it hit me ... I'm probably not alone.

To participate: Simple share a tip or offer any advise. Post your list of "Do"s and "Don't"s, perhaps a snippet of code or suggest music to get you into that coding groove. Anything at all, no matter how big or small.

If you want to write a program to help make coding easier, faster, or just more fun, that'd be great too. I've got an idea for a little code helper so if you decide to write one, you won't be alone. :-)

Just a few suggested topics:

What is your LB programming environment like?

What books, if any, have been extremely helpful.

What websites do you find invaluable?

What programming aids can't you live without?

What editor do you use? What feature(s) attracted you to it?

What font do you use while programming?

Some Guidelines

- Start Date is: Monday 28-Jan-2008 (today)
- End Date is : Valentine's day 2008. (Thu 14-Feb)
- Upload any programs you create for the Fest here.
- We request you do try keep image file sizes small.
- Possible forms the entries can take... article, lesson browser lsn, demonstration program, snippets, coding tools, plus, of course, any guidance you'd care to offer in this thread. Entering ShareFest is

painless.

- Voting will begin the day after Valentines and will continue for a week (Fri 15-Feb to Thu 21-Feb).

The name(s) of the winner(s) will be placed on the Wiki page with all the other winners.

So with that wide open invitation, let ShareFest 2008 begin! ;)

List Entries Here

If your entry is code that will be placed on its own page here, create a link to the page by placing the page name between double squared brackets like this: `[[YourEntryName]]` *Please keep the page name short and try to avoid blank spaces.* After you've saved the editing of this page, click the link and go to your new page to edit it. Paste your code and save your edits.

If your entry is a zipped file, upload it with the wiki uploading feature and place a link to the file here. File links look like this: `[[file:filename.ext]]`

- [Noble's Program Development Steps](#)
- LBRiched.DLL will create a single RichText control that can include a built in, right-click context menu. It is free and available at <http://alycesrestaurant.com/dll.htm> - - [Alyce](#)
- [harmonv's WhatsMyLineType](#) utility tells you if a file uses Windows, HTML, Linux or Mac line-endings
- [harmonv's McCub](#) coding tool allows you to change the case of LB keywords and functions.
