

Shared Code

Welcome to the shared code page. All code here is provided courtesy of our wonderful Liberty BASIC wikispace members. If you'd like to add code, just create a new page and link to it here under the proper category.

Tips and information should go on the [Tips](#) page. If you have code that you don't want to allow others to modify, create a page on [Member Pages](#) and link to your code there.

Code linked to in this public area can be modified by all members. (Modifying means deleting non-working code, enhancing valid code, or correcting erroneous code.) Please make sure that code works properly. Test it before posting it. No harmful code is allowed.

If you correct someone else's code, consider sending them a message through wikispaces or the Liberty BASIC forum explaining your changes.

[Please read the Attribution-ShareAlike license before sharing code.](#)

Table of Contents

[Shared Code](#)

-

[Audio/Sound](#)

[API](#)

[Database](#)

[Date Algorithms](#)

[Sprites](#)

[String Manipulation](#)

[Utilities](#)

[Other Categories of Code](#)

Audio/Sound

- [Speech Library](#) - [lbjoseph](#)
- [Get the length of a wave file](#)
- [Get the length of a wave file 2](#)
-

API

- [ATL File Viewer](#)
- [Determine if a window is minimized.](#)
- [Determine if current user is an administrator](#)
- [Get command line arguments](#)
- [Get last error](#)
- [Popup menus with Windows API](#)
- [Named Pipes](#)
- [API Progress Bars](#)
- [Drag and Drop Functionality \(Requires WMLiberty\)](#)
- [Hide And Show Menu Items](#)
- [Open and Save File Dialogs](#)
- [Calling methods in COM objects](#)
- [BAS File Association Utility](#)

Database

- [Simple Database Framework using a random access file](#)
- [SQ3_4_LB.dll file needed for LB and SQLite tbohon](#)

Date Algorithms

- [Get Name of Day for a Date](#)
- [Day and Date Functions](#)
- [When is Easter](#)
- [Nth Day of Month](#)

File I/O

- [Line input from a text file](#)
- [Load an array from a .csv file](#)
- [Native file copying function](#)
- [File Library](#) - [lbjoseph](#)
- [API file truncate](#)

Games

- [Entrap puzzle - winner of Summer 2006 contest](#)
- [Entrap puzzle - with wizard added](#)
- [Text Adventure Engine](#)
- [Chess](#)
- [2D Maze](#)
- [Cave Dude Eat Food](#)
- [Mining game](#)
-

Graphics

- [Scrolling line graph](#)
- [Simulating state-changing LEDs](#)
- [How to FLUSH Without Running Out of Resources](#)
- [Getting the Dimensions of a PNG Image](#)
- [DrawSpritesYourself](#)
- [gx Graphics Library](#) - [lbjoseph](#)

GUI

- **Windows:**
- [Centered Dialog Modal Window](#)
- [Transparent Window](#)
- [Managed Cascade](#)
- [Fake Window](#)

- [Multiple File Selection Dialog](#) - [lbjoseph](#)
- **Controls:**
- [Multiline Button Text](#)
- [Managing Multiple Listboxes](#) (Source and Destination

Listboxes

- [Alphabet Buttons](#)
- [Make Bitmap Button](#) - [KcDan](#)

Internet

- [Winsock Client/Server](#)
- [HTML Music Page](#)
- [Simple HTML page coder](#)
- [Rss Parser](#) - [ozgur_erdiller](#)
-

Interpreter

- [Tiny Basic v1.1](#)
-

Math Algorithms

- [Convert to Roman Numeral](#)
- [Decimal-to-Binary conversion function](#)
- [Conversion to Scientific notation](#)
- [Pi a la modulus](#)
- [Vector 2d library \(a library & demonstrations\)](#)
-

Sprites

- [How to create and animate a sprite within one program](#)
- [A Jumping Sprite](#)

String Manipulation

- [GetWordCount function](#)
- [Removing a character from a string](#)
- [Removing a character from a string 2](#)
- [Removing character\(s\) from a string](#)
- [Replacing characters in a string](#)
- [Parsing LB4 Lessons To Texteditor](#)
- [Parsing LB4 Lessons To Texteditor - another version](#)
- [Calculating CRC-32 value from a string](#)
- [Calculating the SHA256 digest from a string](#)
- [TranslationAssistant](#) - [James_Young](#)
- [SubList Library](#) - [lbjoseph](#)

Utilities

- [Code Formatter](#) - [clydew](#)
- [A Structured Program and Plot](#)
- [XREF - A LB Cross Referencer terciops](#)
- [Field Finder - A Navigation Utility using LB and Google Earth terciops](#)
- [Random Access File Maker II](#) - Create random access data files for use in your programs.

Other Categories of Code

Please add categories as needed in alphabetic order.

- Code page link goes here. Enclose your user name after in double square brackets.
